CONTENTS

Automated Electron Step Size Optimization in EGS5 1
S. J. Wilderman

Upgrade of CGview 14
A. Takamura

Molière Distributions Derived from Numerical Functional Transforms and The Simultaneous Distribution between The Deflection Angle and The Spatial Displacement 18
T. Nakatsuka

Comparison of Multiple Coulomb Scattering Distributions: Numerical Calculation, Molière Theory and Monte Carlo Sampling 28
K. Okei

Investigation of the Variation of the Reading Value by Absorbed Dose in the Glass Rod Dosimeter Using EGS4 35
Y. Shiota

Effective Energy Evaluation in the Low-Energy X-Rays Domain by an OSL Dosimeter 40
A. Suzuki

Investigation of Simulation of Cherenkov Light with EGS 48
N. Kadoya

New Development of High-Energy X-Ray Primary and Scatter Dose Kernels by Monte Carlo Simulation 53
M. Sasamori

Analysis of Variation in the Position of Maximum Dose in the Percentage Depth Dose with Field Size Using EGS4 66
M. Yoshikawa

Fundamental Examination of Film Dosimetry in Radiotherapy 71
C. Nejigaki

Study on the Establishment of the Radiation Safety Standard for Y-90 in Nuclear Medicine 75
I. Yamaguchi

Absorbed Doses to the Urinary Bladder Wall Considering Radiosensitive Cells 81
Y. Watanabe

Evaluation of The Patient Internal Organ Doses in Positron Emission Tomography Using EGS4 88
K. Tsuda

Estimation of Internal Dose Distribution of ^{90}Y Beta-Ray Source Implanted in a Small Phantom Simulated Mice 94
Y. Sato

Evaluation of External Radiation Exposure of Human Involved in Equine Bone Scintigraphy 101
K. Oono

Photoneutron Yield in Steel Shield by Electron Beam from Medical Linear Accelerator 106
Y. Fujita
