

CONTENTS

X-ray Computed Tomography Reconstruction using Scattered Radiation 1 <i>K. Takemoto, Y. Yamazaki, and N. Toda</i>	
Verification of In-Phantom X-ray Energy Spectra in Dual-Energy Computed Tomography <i>T. Ishii, H. Numamoto, Y. Hirai, S. Koyama, M. Kawano, and K. Ohashi</i>	9
Quasi-Monoenergetic Photon Field of 200 keV using a Radioactive Source with Back-scatter Layout <i>S. M. Tajudin, Y. Namito, T. Sanami, H. Hiaraya, and H. Iwase</i>	15
Calculation of Dose Rate Distributions for a Ruthenium Ophthalmic Applicator <i>M. Kato, T. Kurosawa, and N. Saito</i>	24
Effect of the Difference in Electron Cutoff Energy on Surface Dose Calculation in the Monte Carlo Linear Accelerator Simulation of Megavoltage Photon Beams <i>A. Takeuchi, T. Raich, R. Yoshida, K. Kojima, M. Niwa, M. Komori, and H. Oguchi</i>	30
Evaluation of S Values of ^{99m}Tc for Multi-Region Models of Kidneys in the ICRP Voxel Phantoms <i>S. Hato and S. Kinase</i>	37
Investigation of Backscatter Factor in Mammography using EGS5 <i>H. Numamoto, T. Ishii, Y. Hirai, and S. Koyama</i>	45
