

CONTENTS

| | |
|---|----|
| Numerical Calculation of the Goudsmit-Saunderson Multiple Scattering Angular distribution 2: Comparison with the Small Angle Approximation | 1 |
| <i>K. Okei and T. Nakatsuka</i> | |
| Effects of Scattering on the Reconstruction of Dual-Energy X-Ray CT | 7 |
| <i>K. Tokumoto, Y. Yamazaki, and N. Toda</i> | |
| Accuracy Validation of Dose Evaluation for Dual Energy CT | 15 |
| <i>D. Hayashi and S. Koyama</i> | |
| A Response Study with Combination of Particle Transport and Optical Transport Calculation for Scintillation Detector | 20 |
| <i>M. Hayashi, H. Nishizawa, H. Nakajima, and M. Nakanishi</i> | |
| Counting Efficiency of Sealed Sheet Sources for Calibration of Whole-Body Counters by Monte Carlo Simulation | 26 |
| <i>R. Kouno and N. Ishigure</i> | |
| Evaluation of Specific Absorbed Fractions for Thyroids of ICRP/ICRU Voxel Phantoms | 30 |
| <i>M. Kimura and S. Kinase</i> | |
| About $g(r)$ Function in AAPM TG-43 | 36 |
| <i>S. Tsuji and N. Narihiro</i> | |
| Monte Carlo Study of Virtual Plane Source of Linear Accelerator in Radiotherapy | 43 |
| <i>T. Rachi, K. Ota, A. Henmi, Y. Iwamoto, M. Tamura, T. Matsunaga, Y. Oribe, M. Komori, and Y. Obata</i> | |
| Investigation of the Dose Distribution in the Inhomogeneous Phantom Simulated Lung Tumor | 49 |
| <i>K. Ota, T. Matsunaga, K. Yasui, K. Aoyama, J. Maruchi, T. Shimozato, Y. Obata, and M. Komori</i> | |
| Detail Analysis of Dose Distribution in Phantom in X-Ray CT using EGS5 | 58 |
| <i>T. Haba and S. Koyama</i> | |
| In-Phantom Beam Quality Change in X-Ray CT : Detailed Analysis Using EGS5 | 62 |
| <i>S. Kondo and S. Koyama</i> | |
