# Proceedings of the Ninth EGS4 Users' Meeting in Japan

July 31 - August 2, 2001.

KEK, Tsukuba, Japan

Edited by

H. Hirayama, Y. Namito and S. Ban

KEK, High Energy Accelerator Research Organization

## FOREWARD

The Ninth EGS4 Users' Meeting in Japan was held at High Energy Accelerator Research Organization (KEK) from July 31 to August 2. The meeting has been hosted by the Radiation Science Center. Nearly 100 participants attended the meeting.

The meeting was divided into two parts. Lectures concerning the EGS4 System, Mortran, User code, HOWFAR, how to use PEGS4, how to write source routine and the EGS4 shower display system on PC were given at the first half. Practices to install the EGS4 system on the UNIX workstation or PC and to run PEGS4 or user code were also performed. In the later half, 18 talks related EGS4 were presented. The talks covered the wide fields, like the medical application and the calculation of various detector response *etc.* These talks were very useful to exchange the information between the researchers in the different fields.

Finally, we would like to express our great appreciation to all authors who have prepared manuscript quickly for the publication of this proceedings.

## CONTENTS

<b>The Physics of Electron/Positron Transport in PENELOPE</b>	1
<i>F. Salvat, J.M. Fernández-Varea, E. Acosta and J. Sempau</i>	
<b>Practical Derivation of Molière Angular Distribution with Ionization</b>	6
<i>T. Nakatsuka</i>	
<b>Application of the Monte Carlo Coupling Technique for Evaluating Shielding Ability of a Modular Shielding House</b>	16
<i>K. Ueki, K. Kawakami and D. Shimizu</i>	
<b>A Positioning Method of the High-Energy Photon</b>	22
<i>K. Maruyama, K. Ito, K. Maeda and M. Chiba</i>	
<b>Application of Ge Semi-Conductor Detector to Whole-Body Counter</b>	30
<i>S. Kinase, H. Noguchi and T. Nakamura</i>	
<b>Evaluation of Absorption Efficiency for NIS Tunnel Junction Detector with Segmented Absorbers</b>	37
<i>R. Nouchi, I. Yamada, F. Yoshihara, and I. Kanno</i>	
<b>EGS4 Calculation of a NaI Scintillation Survey Meter for the Evaluation of <math>^{137}\text{Cs}</math> Contamination in Soil</b>	43
<i>A. Toyoda, K. Eda, Y. Namito</i>	
<b>Development of Beam Intensity Monitors for Intense Undulator X-Rays in SPring-8</b>	48
<i>T. Itoh, N. Kishi, K. Shin, S. Taniguchi, N. Nariyama, S. Ban and Y. Namito</i>	
<b>Specification of Radiation Field Around a Gamma-Ray Source</b>	56
<i>K. Oda, N. Miyawaki, T. Yamauchi, and S. Baba</i>	
<b>Measurements of Photo-Neutrons from Thick Aluminum Target by 2 GeV Electrons</b>	63
<i>S. Ban, H. S. Lee, T. Sato, S. Maetaki and K. Shin</i>	
<b>Monte Carlo Simulation for Correction of Ionization Chamber Wall</b>	67
<i>T. Kurosawa, N. Takata, and Y. Koyama</i>	
<b>Improvement in the Energy Characteristics of a Vacuum Ionization Chamber</b>	72
<i>R. Nishiura, H. Nishizawa, T. Hirai and T. Hirano</i>	

<b>An EGS4 Monte Carlo User Code for Radiation Therapy Planning</b>	80
<i>J. Funabiki, H. Saitoh, O. Sato, S. Takagi and K. Saito</i>	
<b>Dose Estimation of Patients from Diagnostic X-Ray Based on CT-Voxel Phantom,</b>	87
<i>K. Akahane, M. Kai, T. Kusama and K. Saito</i>	
<b>Monte Carlo Simulation Analysis of Backscatter Factor for Low-Energy X-Ray</b>	92
<i>K. Shimizu, K. Koshida and T. Miyati</i>	
<b>Development of Gamma-Ray Imaging Detector Based on Micro-TPC</b>	100
<i>T. Nagayoshi, T. Tanimori, H. Kubo, R. Orito, M. Ueno, A. Ochi, Y. Nishi, S. Koishi</i>	
<b>Count Rate Performance Simulations for Next Generation 3D PET Scanner</b>	108
<i>K. Kitamura and H. Murayama</i>	
<b>Examination of the X-Ray Piping Diagnostic System using EGS4 (Measuring the Thickness of a Steel Pipe with Rust)</b>	115
<i>G. Kajiwara</i>
